UV Total Recovery Instruction Manual

ULTRAVIOLET OZONE UV-C
Shoe Sterilizer and Sanitizer

SAVE THIS MANUAL FOR FUTURE REFERENCE

FOR HOUSEHOLD USE ONLY BY ADULTS
KEEP AWAY FROM CHILDREN

IMPORTANT SAFEGUARDS

When using electrical appliances, basic safety precautions should always be followed carefully.

PLEASE READ ALL INSTRUCTIONS BEFORE USING THE PRODUCT

SAFETY GUIDELINES - DEFINITIONS

For your SAFETY and PROTECTION, it is very important for you to read and understand this instruction manual before use. Please pay particular attention to DANGER, CAUTION and WARNING sections as they are designed to call particular attention to potential dangers when using any electrical product or appliance.

DANGER: Indicates an imminently hazardous situation which, if not avoided, will result in death or serious injury.

WARNING: Indicates a potentially hazardous situation which, if not avoided, could result in death or serious injury.

CAUTION: Indicates a potentially hazardous situation which, if not avoided, may result in minor or moderate injury.

SAFETY: Indicates a potentially hazardous situation which, if not followed, may result in minor or moderate injury.

DANGER **To reduce the risk of electroshock:**

- Always unplug the UV Total Recovery sanitizer from an outlet when not in use.
- Do not operate/drop near water or while bathing or swimming.
- If the device falls into water, unplug immediately before reaching for the device.
- Do not use if cord is damaged.
- Keep the cord away from heated surfaces.
- Do not insert any objects into any openings.
- UV lamp is fragile, so use with caution.

WARNING To reduce the risk of damage to your eyes, electrocution, fire or personal injury:

- KEEP OUT OF REACH OF CHILDREN.
- Only use as intended. Use according to this manual's instructions without tampering or modifying the device in any way.
- Close supervision is necessary when any appliance is used by or near children and people with special disabilities.
- Do not allow the device to be used as a toy.
- To avoid UV exposure to eyes, always use protective bags. Do not look directly at the lamp.
- Shock Hazard. To protect against risk of electrical shock, do not put unit or power supply cords in water or other liquid.
- Do not use if device is damaged, not working properly or has broken lamps.
- Do not operate in the presence of explosives and/or flammable fumes, smoke or liquids.
- Do not use outdoors or on wet surfaces.
- Do not handle the device with wet hands.
- Do not use on wet or damp shoes. Allow shoes to dry before using.
- Do not abuse the cord. Never carry the device by the cord or yank to disconnect from an outlet. Instead, gently grasp the electrical plug and pull to disconnect.
- Never carry device by its ultraviolet light or mishandle the bulb.
- Do not allow the cord to hang over the edge of a table or counter or touch hot surfaces.
- Use the charger only in a standard electrical outlet (100V-240V).
- This device is intended for household use only and not for commercial or industrial use.
- Use only as described in this manual. Use only with manufacturer's recommended attachments and materials.
- Unplug the charger from an outlet when not in use.

CAUTION To reduce the risk of common injury or health problems:

- THIS DEVICE USES ULTRAVIOLET LIGHT (UV) TO KILL HARMFUL BACTERIA
- Do not look directly at the light.
- Never turn on the device until it is placed inside the shoe and covered completely by protective bag.
- Do not remove the device from the shoe while it is still turned ON.
- If the device does not automatically turn off after approximately 15 minutes, the timing mechanism may be malfunctioning. Turn off the device, disconnect the power source and contact us immediately at 1.888. 689.6687
- This device is not recommended for use by people with reduced mental, physical and sensory capabilities. Extreme caution should be used along with careful supervision. The device should never be left unattended in such rare cases.
- If the device is dropped and/or if the ultraviolet light is damaged or broken, discontinue use.
- The unit should be placed inside protective bags at all times when in use.

SAFETY To prevent common problems associated with electrical and/or ultraviolet devices:

- As a safety precaution, this device is equipped with two safety features:
    1. One Minute Delayed Start
    2. Infrared Exposure (IR) sensor that detects human heat approximately 3.5 feet away from the unit pauses device automatically to avoid UV exposure.

SAVE THESE INSTRUCTIONS

Congratulations and Thank You for your purchase of the

UV Total Recovery shoe sterilizer and sanitizer device.

The UV Total Recovery sterilizer and sanitizer product was developed and clinically tested by board certified physicians for their patients suffering from a variety of diseases and ailments. After many years of painstaking research and observations in medical clinics, our system has been perfected to help people recover healthy odor free feet

The UV Total Recovery shoe sterilizer and sanitizer:

1. Designed as the fastest ultraviolet shoe sanitizer on the market, works in just 15 minutes.
2. Clinically proven system to help kill and eliminate germs, bacteria, fungi and odor that affect your feet.
3. Features two (2) Safety features to add eye protection against UV light exposure.
4. One Size Fits All for easy convenience for the entire family.
5. Approved and recommended for use by the physicians.
6. All testing done in US.

Carefully read this manual to maximize your experience with this innovative product. We look forward to hearing from you and welcome your comments and suggestions. Please visit our website at www.uvtotalrecovery.com and you can reach us by email at contact@uvtotalrecovery.com.

To Your Health and Total Recovery,

Ken E. Kelley

CEO

PRODUCT FEATURES AND BENEFITS

Tiny microscopic organisms are all around you, in the air you breathe, and especially in the socks and shoes you wear daily.

According to recent studies at the University of Arizona where researchers tested people's shoes, some interesting facts came to light:

- They found 9 different species of bacteria of the type that can cause infections in the stomach, eyes and lungs.
- They found that bacteria lives longer on the soles of shoes than in other places. This is because as we walk we constantly pick up new debris that feeds the growth of more bacteria.
- They found that children under 2 are most vulnerable to these bacteria because they play on the floor and put their hands and other objects in their mouths an average of 80 times an hour.
- They found that the majority of bacteria contained coliform that comes mostly from human and animal waste.

Why Do Your Feet/Shoes Stink?

Blame it on the bacteria. They normally inhabit your feet and crave dark, damp places such as the insides of sweaty shoes where there is no fresh air. They quickly multiply in heat and sweat conditions, and not wearing socks multiplies them exponentially.

Under perfect conditions, bacteria colonies will take over your feet. Bacteria inhabitants, inside your dirty socks and/or shoes, eat dead skin cells and oils from your skin. The colonies grow rapidly and get rid of waste in the form of organic acids. It's those organic acids that smell so bad.

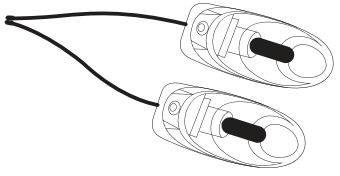
Some people's feet smell worse than others because they sweat more profusely. If you're one of the unlucky, your feet are home to naughty bacteria called Micrococcus sedentarius that produce more than just stinky organic acids — they also produce stuff called volatile sulfur compounds. Sulfur compounds are awful smelling (like a rotten egg), and they make you stand out in a crowd (wrong kind of attention).

UV Total Recovery Is Your BFF!

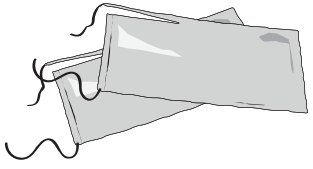
UV Total Recovery provides a clinically tested ultraviolet ozone enhanced sterilization and sanitization product to protect your feet from bacteria, germs and fungi, the enemies of healthy feet. UV Total Recovery features patent-pending technology to neutralize and eliminate harmful bacteria and germs that could lead to disease and sickness. UV Total Recovery is the only residential ultraviolet ozone protection system to remove odors, kill fungus and optimally sterilize away germs/bacteria with UV-C germicidal radiation. When you place the sterilizer and sanitizer into your shoes for just 15 minutes, it kills 99.9% of the bacteria invaders in your shoes, therefore also eliminating the bad odor.

Icon/Picture / Illustration	Features	Benefits
	UV and ozone sterilization double action (5 watt UV lamp with ozone)	This device offers the most powerful and effective way to sterilize and sanitize household items. Ozone also has the ability to kill bacteria, viruses and odors.
	IR sensor detects human heat movement within 1 meter (will pause UV lamp for 10 seconds) when 10 seconds has passed and human heat movement is no longer detected, the lamp will resume its function and continue the remaining time left to sterilize. Post 15 min of work, the device will auto shut off.	IR sensor is one of the 2 safety features to prevent UV light exposure to eyes.
	On/Off Switch	Automatic timer that sets and turns on and off. Stops device and resets timer for 15 minutes.
	One Size Fits All	One device benefits whole family, saving consumers money
	Simple and durable design without moveable parts	Less returns due to breakage

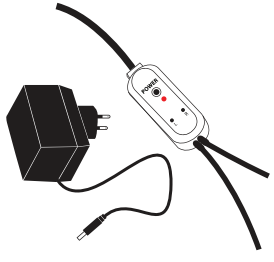
Contents:



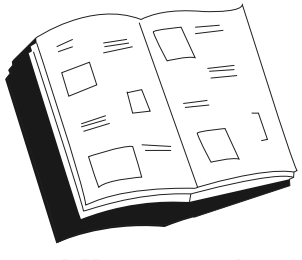
2 Shoe sterilizer and sanitizer inserts (1 pair)



2 Protective shoe bags

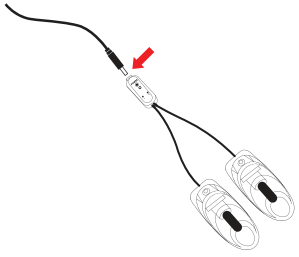


1 Power supply connector

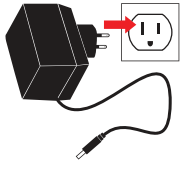


1 User manual

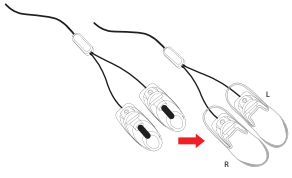
How to Properly Use UV Total Recovery:



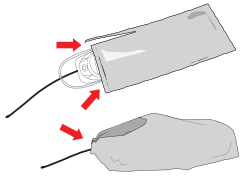
Step 1: Connect adapter cord into ON/OFF switch.



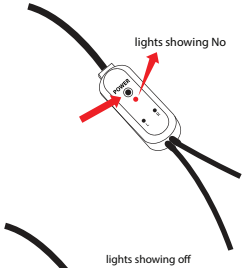
Step 2: Plug the power supply into an outlet (AC 100V/240V); red light will come ON, noticeable on the adapter.



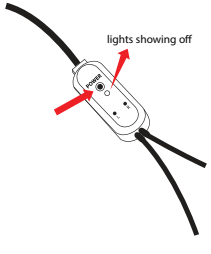
Step 3: Insert Right UV device into a right shoe and Left UV device into a left shoe.



Step 4: Place your shoes inside the UV proof protector bags. Close the bags securely.



Step 5: Push ON/OFF button to start the device (device will start automatically after a minute)



Step 6: Wait 15 minutes until the UV Total Recovery shoe sterilizer and sanitizer is finished before removing. The **ON/OFF** light must be in the off position (no lights showing).

Troubleshooting

Situation: If your device doesn't start in one minute:

- Make sure there is no heat source or moving human within 1 meter (3.5 feet) of the device.
- Stay clear of the device (3.5 feet).
- Check if it's plugged in properly and the light on AC adapter is ON.
- If you checked these steps and your device is still not on, please call 1.888.689.6687 for technical assistance.

Situation: If your device doesn't turn off:

- The device will only run a full cycle of 15 minutes, if there is no human heat or any heat source detected within one meter (3.5 feet).
- Unplug the device and call 1.888.689.6687 for technical assistance.

Situation: If during the course of normal operation one of the insert lamps shuts off while the other continues to run:

- As each shoe sterilizer insert has its own infrared sensor, it is possible for only one insert to sense movement or heat, temporarily pausing operation, while the other insert is unaffected. This is perfectly normal. The paused insert lamp will resume its 15 minute cycle once the heat/movement no longer exists. When this occurs, one insert will complete its 15 minute cycle before the other.
- Check to make sure there is no heat source or moving human within 1 meter (3.5 feet) of the device. Once removed, the insert lamp that is off should resume operation.
- Do not push the ON/OFF switch while one insert lamp is running and the other is not. This will cause the two shoe inserts to be out of sync and will shut off the lamp that is on and attempt to turn on the lamp that is off. If this occurs, to bring the two inserts back into sync simply unplug the power supply from the outlet. Wait a few moments, then plug the device back in and push the ON/OFF switch to begin normal operation.
- If the problem persists, and the lamp is not damaged or burnt out, call 1.888.689.6687 for technical assistance.

Warranty Information

LIMITED WARRANTY

UV Total Recovery Technologies, Inc. (UVTR) is proud to stand behind the quality and efficacious design of our patent pending sterilizer and sanitizer. This product is warranted to be free from defects in material and workmanship for one (1) year from the date of original purchase. The lamps carry a warranty of 60 days. This warranty does not cover normal wear and tear or abuse. If this product is determined to be defected, UVTR will replace the product at no charge. The purchaser must return the product along with proof of purchase for replacement to:

UV Total Recovery Technologies, Inc.
Returns Department
23914 100th AVE SE,
Kent, WA 98031

This warranty does not cover damage due to acts of God, accident, misuse, abuse, negligence, or modification of, or to any part of the Product. This warranty does not cover damage due to improper operation, maintenance, or attempted repair by anyone other than the manufacturer. This warranty does not cover Products sold AS IS or WITH FAULTS. Proof of purchase in the form of a bill of sale or receipt, which is evidence that the unit is within the warranty period, must be presented to obtain warranty service.

All returns should be sent to UVTR. Send only the Product and proof of purchase to the address above. You can also contact our customer service dept. at 1.888.689.6687, Monday through Friday, 8:00 am to 5:00 pm PST.

Warranty disclaimers

Any implied warranties arising out of this sale, including but not limited to the implied warranties of description, merchantability and fitness for a particular purpose, are limited in duration to the stated warranty coverage. In no event shall UV Total Recovery Technologies, Inc (UVTR) be liable for loss of use of this product or for any indirect, special, incidental or consequential damages, or costs, or expenses incurred by the consumer or any other user of this product, whether due to a breach of contract, negligence, strict liability in tort or otherwise. UVTR shall have no liability for any personal injury, property damage or any special, incidental, contingent or consequential damage of any kind resulting from the use of this product. Some states do not allow limitations on how long an implied warranty lasts or the exclusion or limitation of consequential or incidental damages, so the above limitation may not apply to you.

Legal remedies

This warranty gives you specific legal rights and you may also have other rights that vary from state to state.

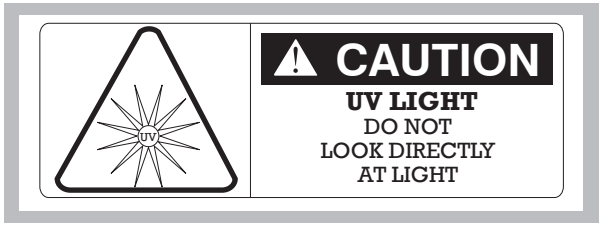
WARNING:



WARNING!

This device uses ultraviolet light to kill germs and bacteria which can be harmful to your eyes. Always place the shoe in the shoe bag before powering ON the UV Total Recovery sterilizer and sanitizer.

- Do not power ON the device when it is not inside the shoe bags
- Do not look directly at the UV Light when it is in the ON position
- Do not remove the sterilizer and sanitizer from the shoe while ON
- Do not place near or expose plants or animals to ultraviolet light

Failure to properly follow all safety precautions and instructions may result in vision damage to you or others
